※ Support customisation
※ Other accessories are available

PRODUCT DESCRIPTION

Suitable for large area lawn greening maintenance

The remote control Lawn Mower can complete the work of moving the lawn independently, without direct human control and operation, and has low power, low noise, exquisite and beautiful appearance, and greatly reduces manual operation.

The remote control Lawn Mower is suitable for clearing all kinds of weeds such as reeds, alfalfa, fish grass and other large and small plots of plains, hills, terraces, orchards, and triangles, with simple operation and high work efficiency. We usually use lawn mowers for school and street beautification. In foreign countries, many families have lawn mowers for weeding their gardens.
